

# Real applications in energy production and distribution practice

Round Table Discussion

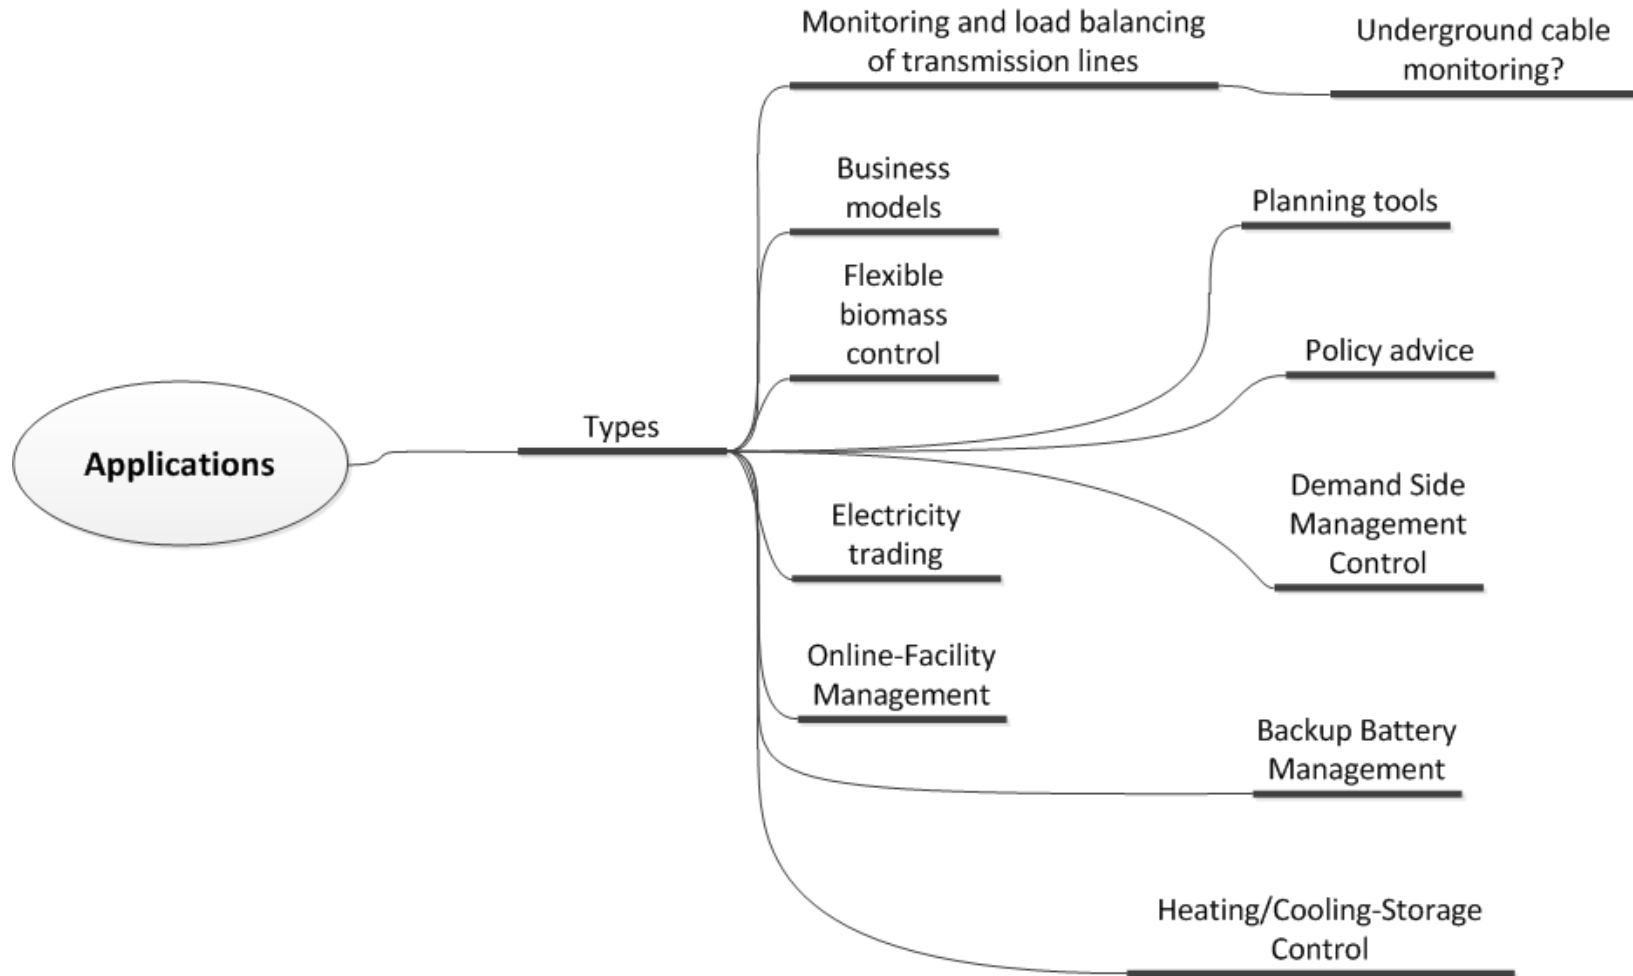

Knowledge for Tomorrow

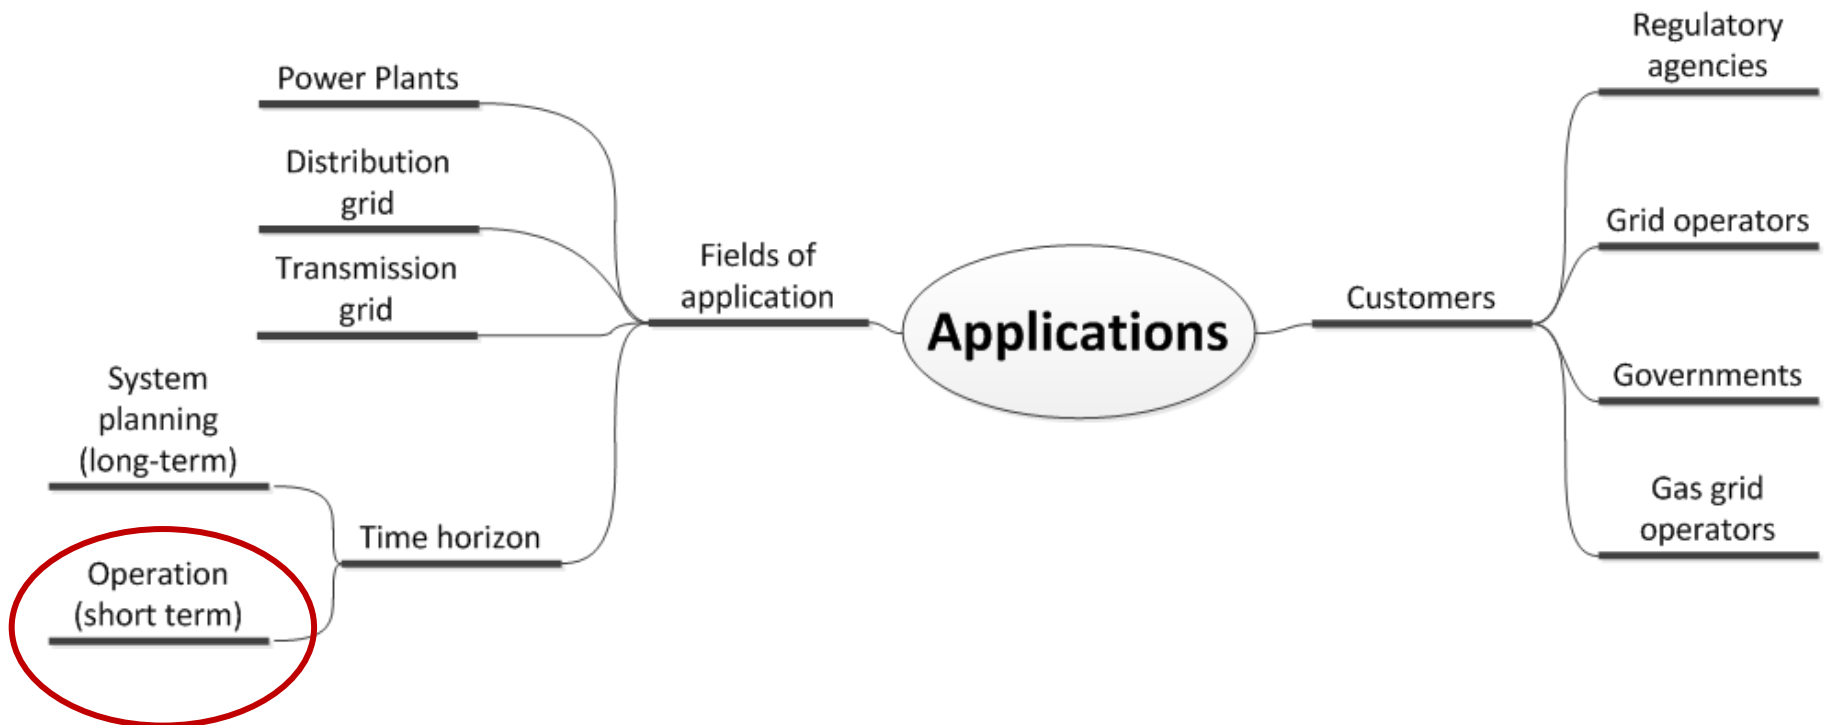

# What are real world application of modern optimization, statistical and computational methods?

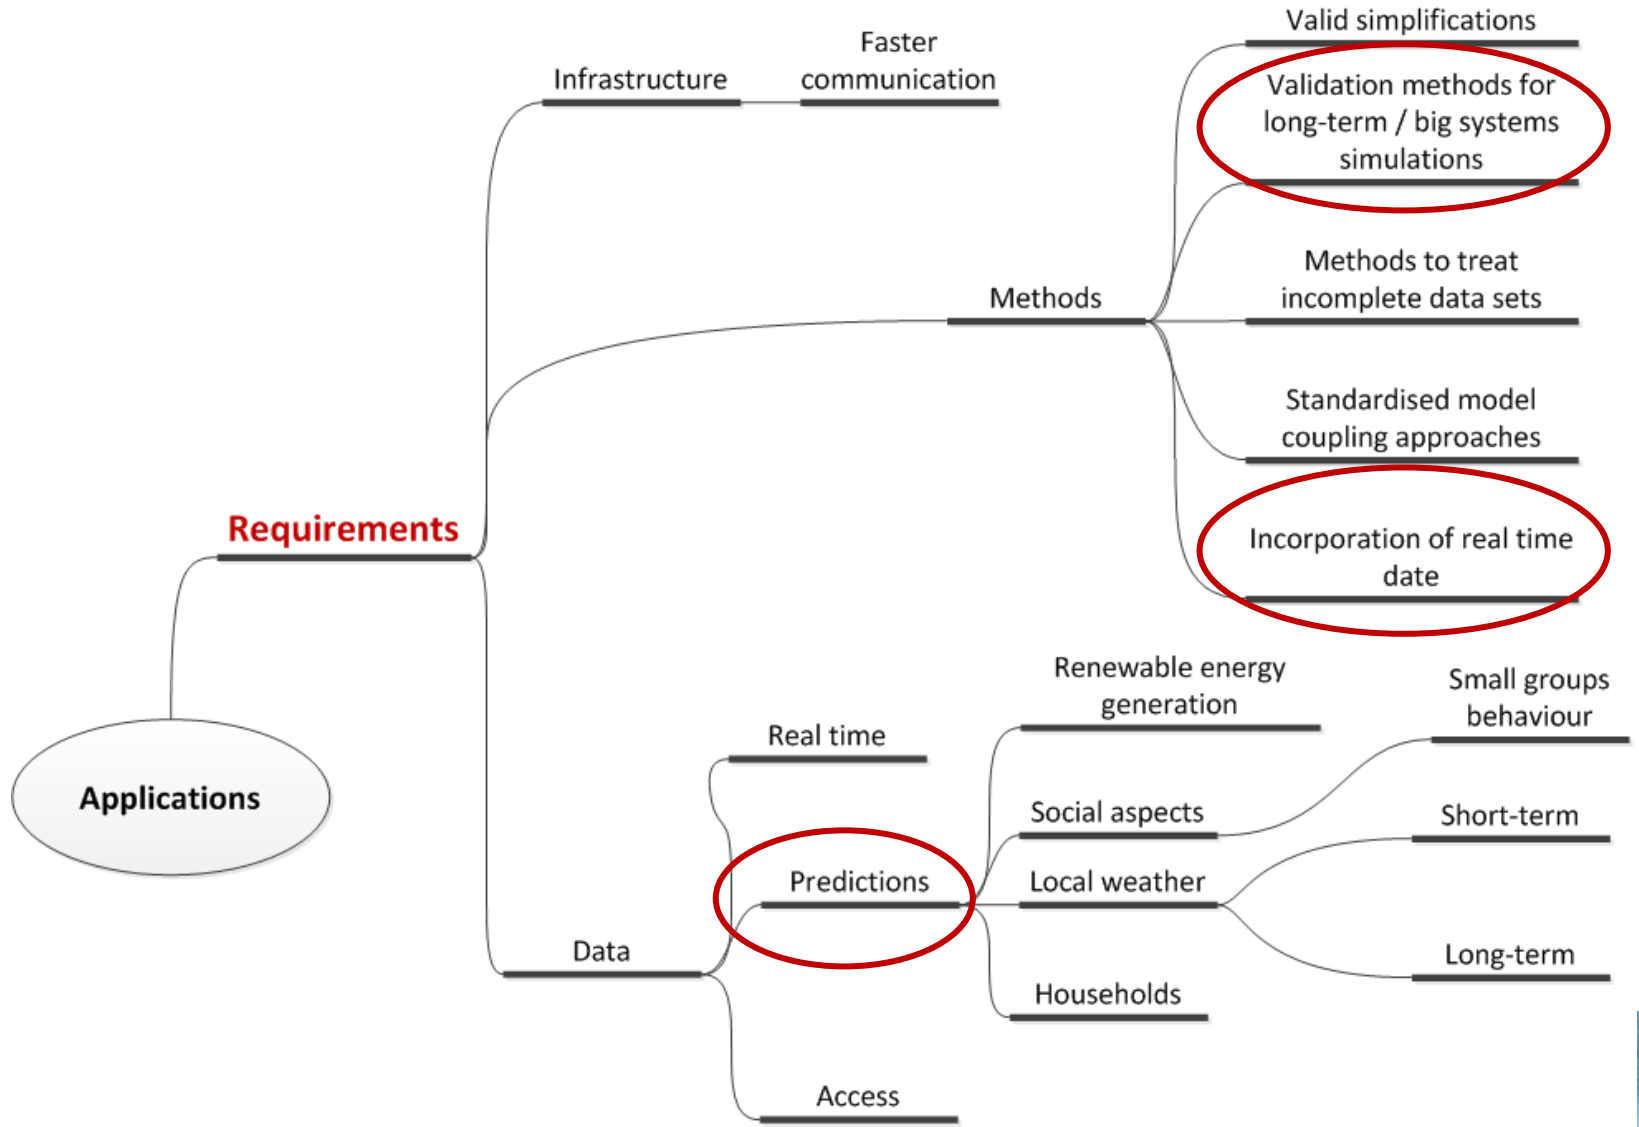

# Types of application of „real world“ models

# „Customers“ and „field of application“

# Requirements for applications in industry and transmission

# How good is the link to practical application

Who comes from industry or has connections and gets feedback from industry and real world application?

# How good is the link to practical application

Who comes from industry or has connections and gets feedback from industry and real world application?

Yes

# How good is the link to practical application

Who comes from industry or has connections and gets feedback from industry and real world application?

Yes

No
